

AI4ML
machine learning and analytics platform

You could be a sole trader, small to medium sized business, a large enterprise, a government organisation, or a charity organisation etc as long as you have data and want to derive insights from your data.

As companies continue to capture vast amounts of big customer or client data, AI4ML can put this data to work by using it as input data to derive intelligent, scientific and predictive data analytics as follows (to mention a few examples);

- Credit card fraud, credit delinquency/repayments patterns analytics.
- Predicting location of stores, offices, shops, and retail outlets based on existing customer data.
- Analytics that provides a 360% view of your customer or client.
- Predicting sales, peaks, troughs and the underlying explanation.
- Analytics on Govt Infrastructure planning, new roads, transport facilities, bridges, airports etc.
- Analytics on population growth in an area.
- Crime stats & terrorism acts prediction and analysis

And Many More

Want to know more, then [sign up for a free trial](#) choose the “Try Cloud/Desktop version for free” menu option when you get to the page” the rest is simple as it only takes about 200 seconds to be up and running. Or you can watch any of our [five minute demo videos](#) for starters.
